## ISKID becomes co-organiser of the 2020 EUROVENTSUMMIT

### Next edition of Europe's HVACR flagship event to take place in Antalya, Turkey

**Istanbul, 5 August 2019.** Representatives of ISKID (Turkey's Air Conditioning and Refrigeration Manufacturers' Association) and Eurovent signed an agreement to jointly organise the 2020 EUROVENTSUMMIT. They announced that the next edition of Europe's major gathering for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies will take place in Antalya, Turkey, from 22 to 25 September 2020.

With the main theme being 'Building Bridges', the focus of the 2020 EUROVENTSUMMIT will be connecting manufacturers and consultants, planners, installers, trade associations and policy makers, between Europe, the East and beyond, towards more sustainable and circular products, and towards more socially and environmentally responsible industry. The organisers also place great value on innovation, providing space for manufacturers to display their latest cutting-edge products throughout the conference area.

Mr Ozan Atasoy, President of [ISKID](#), stated: "It will be a pleasure for us to welcome the industry in Antalya to build and strengthen bridges between the European, Turkish, and Eastern manufacturers and decision makers. We will come together not only to share information, knowledge, and experience, but also to have the opportunity to learn about new technologies, trends, and upcoming challenges."

Mr Naci Sahin, President of the [Eurovent Association](#), added: "It is an honour for me and the entire Turkish HVACR industry to be able to open our doors to the next Summit. Given the current international trade developments, a strong cooperation between Europe and the East is more than relevant in ensuring a global level playing field for developing our industry, promoting state-of-the-art technologies, and removing trade barriers."

Previous editions of the biennial EUROVENTSUMMIT (Berlin 2014, Krakow 2016, and Seville 2018) all proved highly successful, and attendance is increasing. The event has become Europe's most high-profile gathering of HVACR industry representatives, attracting not only manufacturers but also consultants, installers, and policy makers. During the last edition in Seville, over 530 participants came together over the course of four days of meetings, seminars, and events. The 2020 EUROVENTSUMMIT promises to be even more successful and should not be missed by anyone looking to make new connections within the industry, or to stay up to date on the latest regulatory, standardisation, certification, and technological developments.

Are you interested in participating in the next edition? Stay connected and subscribe to the latest updates via [www.eurovent-summit.eu](http://www.eurovent-summit.eu) and our [LinkedIn page](#), following the hashtag #BuildingBridges. Do you wish to play a more active role? Inquiries to become sponsor or speaker can be sent to Ms Andrea Gasparova before 1 November 2019 ([andrea.gasparova@eurovent.eu](mailto:andrea.gasparova@eurovent.eu)).

## About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

## Our Members

Our 'Members' are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
