

Terms and Conditions

The registration form below is dedicated to any organisation willing to participate in one or more Market Intelligence Programmes. Participation includes delivery of the last yearly/quarterly data and publication of the complete historical data. Furthermore, the participants will also receive data of the previous year. After submitting the form below, you will be contacted by our Team for further information.

Participation to any statistic programme is open to all manufacturers represented on the European market, regardless of membership in Eurovent, national associations, or Eurovent Certification. Participation to one does not mean obligation to participate to the other and vice versa.

Participant is a manufacturer/organisation who provided data to Eurovent Market Intelligence for a product section per required period. The Participant is entitled to receive statistic results of a Programme in which they participated.

Original Equipment Manufacturers (OEM) can join Market Intelligence Programmes automatically. In case another company asks to participate, the decision will be taken by the Market Intelligence Committee, on an ad hoc basis. Only OEM should provide data in order to avoid double counting. However, it is highly recommended, that in case the client or distributor of OEM would like to provide data, a single letter signed by both companies will be sent to Eurovent Market Intelligence department. It will indicate:

- The OEM will not include in its own figures the units sold to that specific client or distributor
- The client or distributor will declare in its sales figures for the units it purchased from that OEM

If these conditions are not met, the OEM must declare the units sold.

Consultation is granted for participants automatically. Consultation is also available for a third party interested in data purchase, i.e., a person, manufacturer, company, or institution who does not participate in Statistic programme and does not provide the data for Statistic programme to Eurovent Market Intelligence.
